# **WEATHER OF CONCERN**

## **NORTHERN CALIFORNIA**

- High Risk for significant fire potential due to gusty N-NE wind, low relative humidity (RH), and dry fuels for the Sacramento Valley-Foothills & Diablo Mountains on Monday.

## **SOUTHERN CALIFORNIA**

- Very strong north winds will cause extreme fire behavior on any new ignitions from Santa Barbara County to the western half of Los Angeles County today. However, humidity in this area will be on the high side so the chance of a new ignition will be fairly low.
- The large fire threat will increase late this week across Southern California as the warm and dry conditions combine with gusty offshore winds.

# **WEATHER KEY POINTS**

**10/20/19 - 10/26/19**

## **Sunday**

- Gusty North winds for some areas near the coast of Southern Region through Sunday with gusts 50-75 mph
  - Areas of critical fire weather conditions expected
  - Potential for wind damage, power outages and downed power lines

## **Monday-Tuesday**

- Weak to moderate Santa Ana wind event with northeast winds expected for portions of Southern Region Sunday night through Tuesday.
  - Much weaker than last week's event with gusts between 25 and 40 mph
  - Elevated to periods of briefly critical fire weather conditions possible over portions of the Southern Region during this period
- Potential for heat related health impacts for those portions of the population in some coastal locations in Southern Region that are especially sensitive to heat and without adequate hydration due to the very warm temperatures in the areas of offshore flow Monday-Tuesday
- Locally moderate to gusty offshore winds across portions of Coastal Region Monday and Tuesday along with dry humidity values will slightly elevate fire weather concerns

## **Wednesday-Friday**

- Gusty north to northeast winds and dry conditions for portions of Coastal and Inland Regions around the middle of next week, peaking Wednesday Night and Thursday Morning will likely create periods of critical fire weather conditions
- Another Santa Ana wind event will develop for portions of Southern Region Thursday into Friday and may increase fire weather concerns

## **Saturday**

- No significant weather or water concerns anticipated at this time
